*PR Strategies*

**Description**

The Political and Communication Sciences PhD Program was launched in 2009-2010 academic year, based on the approval no. 3675/April 13, 2009 issued by the Ministry of Education, Research and Youth. It is the one of the third institutions of this kind in Romania.

Although very young, the school has gained a great reputation through its projects: conferences, symposiums, roundtables, book launches, workshops, etc. Also, we plan to develop unique, in the Romanian culture, dictionaries, to create an important school of the history of journalism and communication. The purpose of these activities is to make use of the valuable journalistic heritage of our great political scientists, political analysts, writers and Romanian journalists.

Every year, in February, we organize a scientific session of the PhD students. The papers presented during this scientific session are published in a volume or in Romanian and foreign journals.

The Cluj Political and Communication Sciences PhD program is trying, throughout the topics, to answer to some of the urgent needs of the community and to fill the gaps in the field of bibliography.

A particularity of our doctoral program is that all the theses will be published by a prestigious publishing house, "Doctoralia" collection, soon after the defense. In this way, all research results will be introduced automatically in the national and international circuit.
