

ANAËL LEMAÎTRE, Ph.D.

Current Position

April 2005-Present

ICPC – Researcher – HDR – PhD advisor
Laboratoire Navier – Université Paris-Est
CNRS UMR 8205 – ENPC-ParisTech – IFSTTAR
2 Allée Kepler,
77420 Champs-sur-Marne
France

Research Interests: My research spans the broad area of deformation and rheology in non-crystalline materials, including metallic glasses, granular materials, suspensions, and foams. It aims to construct constitutive equations for comparison with experiments and to study elementary mechanisms of deformation on the basis of molecular dynamics simulations.

Past positions

University of California, Santa Barbara	October 2000 – April 2005
SPEC, CEA, Saclay	October 1998 – September 2000
LadHyX, École polytechnique	October 1994 – September 1998

Education

<u>Habilitation in Physics</u>	Université Jussieu Paris VI, France November 30, 2004
"Elementary Mechanisms of Deformation in Amorphous Materials"	
<u>Ph.D. in Physics</u>	École polytechnique – Palaiseau, France September 1994–July 1998
"Coupled Chaotic Systems: Collective Behavior and Universality" Adviser: Paul Manneville	
<u>Master in Theoretical Physics</u>	École Normale Supérieure, Paris, France September 1993–July 1994
<u>Mechanical engineering degree</u>	École Nationale des Ponts et Chausées, France September 1991–July 1994
Specialty: Applied mathematics and dynamical systems	
<u>Engineer degree</u>	École polytechnique, France September 1988–July 1991
Ranked among first 10%.	

Publications

Over 1000 citations; H index = 21
